Summary

I hold a **Master's degree in Digital Transformation Management** from the **University of Bologna**, one of the world's most prestigious and historic universities. I'm passionate about using data, technology, and digital strategies to drive real impact.

Based in **Erbil, Kurdistan Region**, I combine technical expertise with strategic thinking. I work confidently with tools like **Python, SQL, Excel, Power BI, Tableau**, and have a solid understanding of **A/B testing, machine learning, statistical analysis**, and **exploratory data analysis**. I also have a good knowledge of **digital marketing**, which allows me to connect data-driven insights with user behavior and business goals.

One of the most rewarding projects I've worked on was developing a **domain-level data platform for precision agriculture** as part of my master's thesis—blending innovation, data, and real-world application.

With a background in **finance, data analytics**, and **technology integration**, I enjoy creating smart, efficient solutions that help organizations grow and adapt. I'm also open to **collaborating with international companies**, with a vision to help bring **innovative digital services** to the growing tech ecosystem in **Kurdistan and beyond**.

Courses

Data Analytics Course – *Masterschool*

📅 March-2023 to September-2023

- Extracted data from primary and secondary sources using automated tools.
- Cleaned and preprocessed datasets by resolving coding and data integrity issues.
- Designed and maintained databases and data systems, restructuring data into accessible formats.
- Analyzed data to uncover meaningful patterns and business insights.
- Reviewed performance reports to identify and fix data anomalies and code issues.
- Applied statistical methods to identify trends and support forecasting and diagnostics.
- Quantified key business processes to measure and compare performance over time.
- Researched regional, societal, and global trends affecting business strategy.
- Used Tableau to create dynamic dashboards and visual reports, enabling clear communication of trends, KPIs, and forecasts to stakeholders.
- Developed data-driven management reports to support strategic decision-making.

Experience

■ Senior IT Management at Fakher Mergasori English Private school/Erbil

October-2018 to November -2022

Responsibilities :-

- Installing basic strong and clear IT management systems as a starter business (company) .

- responding to data-related queries and keeping track of these.
- analyzing data to identify trends.
- setting up processes and systems to make working with data more efficient.
- researching new ways to make use of data.

Data Analyst Intern

Agritech Spoke 3 – Cesena – Italy | Feb 2025 – Jun 2025

- Analyzed and evaluated open-source data catalog tools, focusing on **OpenMetadata** for enhancing metadata management and dataset discovery.
- Assessed core features including data profiling, schema discovery, lineage tracking, and API-based querying to support integration with agricultural data sources.
- Worked with **MongoDB** and **PostgreSQL** to validate data catalog compatibility and improve cross-platform metadata accessibility.
- Contributed to the implementation of data governance practices through structured documentation, access control, and metadata standards.
- Improved data transparency and usability for agricultural partners by streamlining dataset indexing and searchability.
- Documented technical findings and presented actionable insights to both technical and non-technical stakeholders.

Education

Bachelor of Science
Computer science**, University of Cihan/Erbil** from Nov-2013 to June-2017

Master of Engineering
Digital Transformation Management**, University of Bologna** from 2023 to 2025.

Achievement

2016: - Ishik university 2nd international innovation contest in Engineering.
2017: - Cihan University 1st national Conference of Cihan University -Erbil on Robotic and Soft computing Applications.
2017: - 2nd International Scientific Conference -Erbil Communication Engineering and Computer Science (CIC-COCOS17).
2017: - Ishik university 3rd national innovation Contest in Engineering.
2017- Cihan university 5th Computer Science department Exhibition for computer Application and internet services.
2017: - 9th software and informatics engineering annual fair (SEDAf 2017).

Skills (technology / functional)

- HTML
- CSS
- Java Script
- PHP
- SQL
- Python
- Data Analysis
- Tableau
- Power BI
- Business analytics using SQL.
- Data warehouse
- IT technician
- Help Desk
- Skills: A/B Testing and Statistical Analysis,
- Exploratory data analysis,
- Data cleaning, data visualization
- Tools: Python (pandas, NumPy, matplotlib),
- SQL (PostgreSQL/MySQL),
- Excel, Google Sheets
- Understanding the General Data Protection Regulation (GDPR)
- Fundamental of Accounting
- AWS
- Marketing (
    - Marketing Strategies & Planning
    - Search Marketing (SEO) & (SEM)
    - Social marketing
    - Content marketing
    - Omnichannel Marketing

Personal Skills

- Communication
- Time Management
- Adaptability
- Excellent IT skills
- Problem Solving
- Decision Making
- Self Motivated
- Leadership
- Business Acumen
- Stress Tolerance
- Polite and gentle
- Organizational Skills

Languages

- Kurdish – Native
- Arabic – Good
- English – Proficiency
- Italian : Beginner
